## NATURAL VARIATION IN CHARACTER

All Fossil Coral products are hand-crafted with unique variations in character and detail. The expressions of sacred geometry are never the same and the natural imperfections evoke the timeless rare antiquity.

Fossil Coral is a type of natural stone that forms over millions of years from the gradual accumulation of ancient coral and other organic materials. These variations in colour, pattern, fracture lines and texture and are not considered to be defects but rather celebrations of the beauty and uniqueness of each piece.

We take great care in selecting high-quality Fossil Coral for our products, and we strive to ensure that each item we produce meets our high standards of quality and craftsmanship. However, because of the natural variations in the stone, no two pieces will be exactly alike.

## PRODUCT CARE

Fossil Coral light shades may be gently dusted or removed from electrical components and hand washed in warm soapy water.
