

PRE-INSTALLATION

1. Unpack carefully to avoid damaging the ceramic disc, glass bulb or the light fitting.
2. Do not operate or install the light if it appears damaged in any way.
3. If the product has been damaged during delivery, notify We Ponder via email within 24 hours of receiving it to rectify.
4. Warranty will not cover damages caused by improper use or alterations to the product.
5. Follow all steps carefully and neatly to prevent damage to the wires or mounting bracket.
6. Isolate the power to the circuit before beginning installation.
7. Ensure hands are clean before handling the ceramic disc and glass bulb as to not mark their surfaces.

INSTALLATION

1. Install the wall bracket by centering it over your 22mm minimum diameter cable hole cut-out. Ensure recessed screw holes are face up and curved edge is facing down.
2. Install the wall bracket onto the wall using flathead 6G screws and appropriate anchors to suit wall substrate.
3. Secure the mounting plate onto the wall bracket with the supplied white M3 grub screw at the top of the plate.
4. Slide the first washer onto the thread bar.
5. Carefully slide the ceramic disc onto the thread bar.
6. Slide the second washer onto the thread bar and push in the supplied G9 lamp.
7. Whilst holding the ceramic disc centered and positioned to your liking, carefully screw the glass bulb until there is a slight resistance against the second washer. Ensure during this step, the glass bulb is going onto the thread as straight as possible. You may loosen slightly if you prefer the indents on the bulb to face a different angle or the ceramic disc to be twisted.
8. Enjoy your We Ponder DUO light!

REQUIREMENTS

1. The light fitting must be installed by a licensed electrician.
2. The wiring and installation of this light fitting must follow local and national wiring rules - eg. AS/NZS 3000.
3. Please refer to our Wet Area IP Zone Diagram for information on appropriate installation locations.
